The Broadway Department Store

Corner Fourth and Broadway
LOS ANGELES

Men's Pants, Worth \$2.50, at \$1.00

This is the greatest value we have ever offered in men's wear. We purchased the entire stock of one of the largest pants manufacturers in America. 'Twas a forced sale and the price was screwed down to a figure that did not cover the cost of production. The lot contains fancy chevrons, cassimeres and tweeds—in desirable checks, stripes and plaids. The goods are well finished and will fit as well as the average custom tailor's work. The seams are guaranteed not to rip. We have sizes for everybody. Waist measure from 36 to 46 with lengths to correspond. Not a pair in the lot worth less than \$2. The major portion of them splendid value at \$2.50. Close buying with us means choice for you, so we offer these sterling values at, per pair, \$1.00. Be prompt if you want them, as they will soon be sold. In ordering state waist measure and length of in-seam.

Shoe Your Family With Staub's Shoes

The most satisfactory shoe store in Los Angeles. Bring in the family and buy their mountain and beach shoes, and before they return home let us show them for a year to come. Saves money and they'll everyone have better shoes. All prices.

Mines and Minerals of Arizona

Mr. C. B. Horsford of this city, who is interested in mining in the district east of Congress, was in Phoenix yesterday and reports great activity throughout that region.

At the Octave mines, which recently sold for \$5,000,000, the mill is grinding up from 125 to 150 tons of good ore daily and has been for the past year, netting the owners from \$50,000 to \$60,000 monthly. This is a good illustration of the profits to be made in legitimate mining with a judicious investment of capital. It is said the investment in this case was about \$250,000 in equipment and machinery and that the plant is second to none other in the territory. Two and a half miles to the north of the Octave on Weaver gulch is the old "Johnson" mine, which produced well in former days. It has recently been opened up nicely and promises early returns.

To the northeast two and a half miles is the Peterson group, on which thousands of feet of substantial work has been done, exposing good bodies of ore. To the northwest, one and a half miles, are the properties of the Gold King and Mountain Side companies, with nearly a thousand feet of work done, and four miles to the west is the Levia-than group, on which a large amount of work has been done. Still farther west is the Pool Gulch properties, now green is the Pool Gulch properties, now nicely equipped. To the south about nine miles is the famous Oro Grande mine.

In all these properties it has been demonstrated that development has opened up better grades and quantities of ore than existed at or near the surface. Prospects are being developed on all sides of the famous Rich Hill, substantiating the statement that deep mining pays.

A NEW PROPERTY

Located in the Pinals by R. J. Morse and Son of Mesa.

J. R. Morse of Mesa some time ago located a mine in the Pinal mountains, forty-five miles east of Mesa, which he now swears will be a winner. The ledge, a satisfactory large one, is increasing in width with depth and also growing richer. He has recently received returns from the El Paso smelter on a shipment of 1,500 pounds of ore taken from the ledge in such a manner as to nearly as possible show an average value. It went more than 20 per cent iron, 5 per cent silver, 20 per cent zinc and 18.6 per cent iron. The last two pieces, though not marketable, are almost as important as the copper and silver, for they constitute the best possible fluxing material.

A TUCSON PROJECT

Preliminaries for the Building of a Big Smelter.

There are a number of immense projects on foot which if they materialize will be of vast benefit to Tucson and southern Arizona, says the Post. One of them is the erection of a 200 ton smelting plant in this city, and this is perhaps one of the most probable of the many which have been advanced. The conditions are so promising that the location of a smelter here, and its successful and profitable operation, that it is a wonder some one has not taken up the matter long ago.

Mr. Charles W. Gregg is in Tucson, having arrived from the east this week, and he comes here, it is understood, to formulate plans for a large smelter. The Post has learned from mining men that Mr. Gregg has secured five promising sulphide properties near the Twin Buttes, which were recently bonded for a period of sixty days by the capitalists he represents. The Sheridan group and the Camy group were bonded this week by men who are said to be his representatives, in order to form a basis of operation, and as soon as a

EX-GOVERNOR ZULICK

Director of a Company Formed to Work Arizona Mines.

The Princeton Copper Mining and Smelting company has been recently incorporated under the laws of South Dakota, with an authorized capital of \$2,500,000. Henry Hamburg, who has for about a year past made his headquarters at Bisbee, is president of the new corporation, and C. Meyer Zulick at one time governor of Arizona, is one of the directors. The remaining officials are New York and New Jersey people. This company, says the Bisbee Review, is organized primarily to develop and operate mining properties in the Huachuca mountains, having acquired three patented copper claims at the head of Ramsey canyon, upon which which property a very favorable report was made by Prof. Blake of the Territorial university, something over a year ago. These claims were opened up, and considerable development work done upon them under the superintendence of Ben Williams before he became identified with the Copper Queen company. In addition to this property the company has several claims in Montezuma canyon. The stock of the company is being placed in the east and extensive operations in the way of development and machinery are anticipated at a comparatively early day.

BISBEE WEST REPORT.

A report received at the Los Angeles office of the Bisbee West Copper mining company states that the main shaft is down to the 600-foot level, where a station is being cut preparatory to sinking to the 700-foot level. A drift will be run from the 600-foot level toward the body of ore encountered at the 500-foot level. The report further states that good results may be looked for—L. A. Mining Review.

BISBEE BELLE'S REPORT.

President Geo. M. Calk, of the Bisbee Belle Copper company, received this week from Superintendent Hughes, at the mines, the following report of work during June:

"From the 64-foot level (as reported for May) the entire dimensions of the shaft, or twelve feet in depth, was a very good one. The formation, with the exception of two small veins, averaging four to eight inches, forming what is called a gangue, defining the true walls of a mineral-bearing ledge.

"From the seventy-foot level to the present depth (ninety-five feet) we have been in a blanket formation of oxide of iron, the usual formation covering large bodies of copper. I think it advisable to drift at the 100-level and again encounter the ore chimney which inclined to the west from the west line of shaft at the 64-foot level; a distance of ten or twelve feet would reach it.

"The oxide of iron formation dips to the west at an angle of about twenty degrees."

Private advice are to the effect that before the middle of next month (August) enough ore will be taken from the mine to pay for the work being done.—L. A. Mining Review.

MINING NOTES.

There was a cave-in at the Harshell mine last Thursday which damaged the workings about \$5,000. No miners were killed. The cave-in will inconvenience the Harshell to a considerable extent. C. M. Roberts, superintendent of the Doe Cabezas Consolidated mine, said, Thursday, says the Range News. About ten days ago they cut a twelve-inch streak of almost pure native copper. They are pushing the tunnel with all possible speed and expect to reach the main ore body in a few weeks.

Col. W. P. Harlow has returned to Tucson after an absence of several months. He has been engaged in developing some copper veins near Matine in the state of Sonora, Mexico. Col. Harlow says there are eighty miners at work and he is opening up rich bodies of ore which will soon require a smelter and other works. A railroad will be built into the mountains from Hermosillo, Col. Harlow says, as soon as the mines are sufficiently developed.—Post.

Superintendent Thomas Lowry, of the Turquoise mine, says that one hundred miners are employed at his camp and at Gleason.

W. S. Wien came down to Wilcox from Johnson the other day on business. He tells the Range News the Peabody is producing heavier than ever and the People's Party and Magazine mines, under the management of Joe Hooker, are showing up nicely and making considerable ore. Fred Baker recently struck a fine body of sulphide ore in the claims he is developing while the Black Prince Copper company has a force of men at work developing the Blue Belle group with the very best of showings. Business is brisk up there and the three general stores, Fiege & Co., W. de H. Washington and W. H. Anderson & Co. are all doing a fine business. Johnson is bound to become one of the best camps in this part.

The Globe Times says: "Globe Miner" union, No. 60, has brought a greater percent of all men in and about the mines into the organization than any other union in the federation. It has less friction with the companies on the one hand, and outsiders on the other, than perhaps any other union of its size. It demands \$1. top and bottom, and the large companies have voluntarily advanced underground men \$2.50, which shows a splendid condition of things. It is the constant object of the union to promote and perpetuate these harmonious conditions. The same harmonious relations exist at the Ray between Ray No. 102 and the management at Troy. Ray union No. 102 is a model little body and is growing every day. We should not fail to show due and prompt appreciation of such favors and courtesies, which simply means, be right.

Skin Diseases

ECZEMA, TATTER, PSORIASIS, SALT RHEUM, ACNE and a great many other diseases of like character are classed as skin diseases, when they could just as properly be called blood diseases, for they undoubtedly originate in the blood, like Cancer, Catarrh, Scrofula, Rheumatism, Contagious Blood Poison, etc.; the only real difference being in the intensity and nature of the poison. The more serious diseases, Cancer, Catarrh, etc., are caused by some specific poison or virus, which is either inherited or in other ways gets into the blood and attacks certain vital organs or appears in the form of fertile seeds and ulcers, while the milder and less dangerous skin diseases are caused by blood humors or an over acid condition of that fluid. These acid poisons, as they ooze out through the pores of the skin, cause great irritation, with intense itching and burning. The eruption may be of a pustular kind, with excessive discharge of thick, gummy fluid, or the skin may be hot, dry and feverish, swollen and fissured. Skin diseases, whether they appear as sores, blotches or pimples, become more deeply rooted and intractable the longer neglected, the skin in time having a thick, hard, rough and unsightly appearance. You can hide the blemishes for a time with cosmetics; and washes, lotions, soaps and powders may relieve temporarily the itching and burning, but eventually the pores of the skin become so clogged up by this treatment that the poisonous matter thrown off by the blood cannot pass out of the system, and settles on the lungs, heart or some other vital organ and endangers life.

To purify and build up the polluted blood is the right treatment for skin diseases, and for this purpose no other medicine is so deservingly popular as S. S. S. It is a perfect antidote for all blood humors, and when taken into the circulation gently but thoroughly eliminates all impurities and puts the blood in a healthy, normal state. The skin can't remain in an irritated, diseased condition when nourished with rich, new blood. S. S. S. is the only guaranteed purely vegetable remedy, and the safest and best skin beautifier. Write our physicians if you have any blood or skin disease, and they will cheerfully advise you without charge.
